Service of the Month

"Perk Me Up"

This progressive facial is awesome! Giving your skin a boost, adding nutrients and hydration, removes surface skin cells to smooth and soften skin.

Original \$125 *Special \$90.00*

5 Ways to Improve Your Skin

1. Using a medical grade Retinol
2. Applying an antioxidant before your sunscreen. Try **SkinCeuticals CE Ferulic**.
3. A full spectrum sunscreen with a SPF of 30 or higher. Try Dr. Zell's favorite, Physical Fusion UV Defense SPF 50 by, **SkinCeuticals**.
4. A deep pore cleanser
5. Monthly medi-facials or/and chemical exfoliation treatments.

Did You Know?

UVA causes aging and is present year round, it has a constant intensity, and it can pass through clouds and glass. UVA causes up to 90% of visible photoaging inducing significant damage to the epidermal areas where most skin cancer occurs.

UVB causes burning, damaging the outermost layers of the epidermis, UVB is primarily responsible for skin reddening and sunburns. UVB plays a key role in tanning and photoaging. UVB rays cannot penetrate glass or other surfaces.
